Husqvarna Mobility recalls 2022-2024 offroad motorcycles with Braktec brake systems

2022-2024 enduro and cross country models with Braktec brake systems to be inspected by an authorised Husqvarna Mobility dealership for replacement of the rear brake calipers.

Valid for all markets

At Husqvarna Mobility, rider safety and satisfaction are the company's highest priorities. As part of its continuous commitment to maintaining the highest standards of quality and reliability, Husqvarna Mobility is initiating a recall of the 2022-2024 enduro and cross country models with Braktec brake systems.

During market monitoring, it was identified that, under certain riding conditions, excessive loads may occur on the rear brake caliper. In rare cases, this could result in the rear brake caliper breaking. As a precautionary measure, the rear brake caliper, including the caliper bracket, must be replaced on all motorcycles subject to the campaign.

Customers who own one of the listed models will be personally notified by letter and are asked to contact an authorised Husqvarna Mobility dealership to schedule a complimentary replacement.

In addition, customers can easily verify whether their motorcycle is affected by visiting the "[Service](#)" section on the official website. The replacement will be performed free of charge and exclusively by authorised Husqvarna Mobility dealers. A full list of authorised dealerships is available on the Husqvarna [website](#) to help customers quickly find assistance.

While only a limited number of cases have been identified, Husqvarna Mobility is taking immediate and preventive steps to eliminate any potential risk. By replacing the affected components on all motorcycles concerned, the company is reinforcing its commitment to rider safety and long-term trust, while ensuring peace of mind for customers.
